Indraprastha Gas Alert

Reuters Bloomberg IGAS.NS IGL IN Exchange Ticker NSI IGAS

Visibility for growth remains weak beyond FY17, maintain Hold

Growth expected to be strong in FY17 but likely to taper off

Indraprastha Gas (IGL) reported strong 1QFY17 result with EBITDA +27% YoY driven by 13% growth each in volumes and per unit EBITDA margin. We have raised our FY17-18 EPS estimates by 5-8% and target price by 14% to INR595 to factor in higher volumes and margins. However, at FY18 P/E of 16x (vs 3 years' range of 8-16x) and P/BV of 3x (RoE 21%), valuations largely discount the likely growth in earnings and we therefore retain our Hold rating. While we factor a 12% volume growth in FY17 aided by government (odd-even rule) and regulatory actions (requirement to convert app-based taxis to CNG etc), the visibility of double digit volume growth beyond FY17 is weak. We estimate the stock currently factors 10% CAGR in volume for the next eight years.

1QFY17 result: Beats estimate driven by strong margins

IGL reported strong 1Q result with net profit up 44% YoY to INR1.5bn (27% above DBe) and EBITDA up 27% YoY to INR2.6bn (+18% DBe) driven by a positive surprise in margins. Per unit EBITDA margin rose 12% YoY to INR6.5/scm helped by lower gas cost (-25% YoY) and is the highest ever. Volume growth was also strong at 13% YoY (highest in 4 years) with CNG +12% YoY and PNG +18% YoY. IGL's associate companies CUGL and MNGL reported a combined 1Q net profit of INR340mn with IGL's share at INR170mn which is 11% of its standalone net profit.
